Job Objective

Looking to apply my software engineering and leadership experience to create impactful solutions and support company and team growth.

Summary

Senior Software Engineer with 10+ years of experience in designing high-load solutions, leading teams, and delivering scalable products. Proficient in Spring, AWS, and modern front-end technologies. Adept at system architecture, requirements formalization, and stakeholder management. Proven track record of optimizing infrastructure and mentoring cross-functional teams.

10+ years of experience in software engineering. Participated in a number of projects based on monolithic and microservices approaches. The main technology stack is built around Spring and AWS infrastructure. Has experience with Dagger plus Spark bundle and Oracle ATG eCommerce Platform. The experience includes developing high-loaded solutions and systems design, requirements analysis and formalization, product delivery, and team leading for 2.5 years.

Key Achievements

- Successfully Led the development of integrating over 110 OpenBanking APIs from scratch (covering 2,500 European banks) and managing 100k+ daily requests for Token.io over three years.
 - Built and led a team of 16, establishing efficient workflows and processes to ensure seamless collaboration and successful project delivery at Smartum.pro.
 - Designed and developed a project from scratch, successfully launching it for commercial use at Samsung.
 - Delivered multiple end-to-end solutions, from MVP to production, including backend services, CMS, and mobile application support.
-

Professional Skills

Platforms & Frameworks:

J2EE, Kotlin, Java 8-21, Spring (Spring Framework, Spring Boot, Spring Data JPA, Spring Security), Oracle ATG, Dagger, Vue.js, React, Redux, TypeScript

Cloud & Containerization:

AWS (RDS, ECS, S3, SQS, VPC, LB, Route 53, Rekognition), Kubernetes, Docker, Firebase

Libraries:

Spark, Retrofit, Feign, OkHttp, Hibernate, jOOQ

Tools:

Gradle, Maven, Jira, Kibana, Kafka, Swagger

Testing & Monitoring:

JUnit, Selenium, ELK, Prometheus, Grafana

Soft Skills:

Purpose-Driven, Leadership, Organization, Critical Thinking, Problem-Solving

Work Experience

Senior Software Engineer, Helmes (Warsaw, Poland)

07/2024 – Present

NDA, dynamic forms app (Warsaw, Poland)

J2EE, Hibernate, Spring Boot, Java 8-21, Kotlin, React with Redux, Kubernetes, Jenkins, Maven, Mongo, Oracle DB

- Delivered key features and enhancements within a custom event-driven framework based on Spring and React framework for data gathering from, ensuring seamless integration and boosting overall system performance.
- Collaborated with cross-functional teams to refine and implement business requirements, consistently meeting tight project deadlines.
- Refactored the codebase to enhance readability and maintainability, significantly simplifying future development and support.
- Optimized framework usage by designing and implementing reusable components, reducing development time for new tasks.

Senior Software Engineer, Samsung R&D (Warsaw, Poland)

05/2023 – 07/2024

Samsung Care+ (Warsaw, Poland)

Spring Boot, Java 21, Kotlin, Vue, AWS, GitHub CI, Gradle, PostgreSQL, Terraform

- Designed the architecture and implemented the backend of the application, ensuring scalability and security.

- Collaborated with stakeholders to clarify business requirements and align technical solutions with business objectives.
- Prepared the production environment on AWS, optimizing infrastructure for performance and reliability.
- Introduced HashiCorp Terraform to the team, streamlining infrastructure management and automation.
- Developed backend services using Spring, Spring Security, Java 21, Retrofit 2, REST, and SOAP, ensuring secure and efficient communication.
- Implemented a CMS for product management with Vue and Spring, enhancing user experience and operational efficiency.

Authorisation Service, NDA (Warsaw, Poland)

Spring Boot, Java 21, Kotlin, Angular, AWS, Mongo, GitHub CI, Gralde

- Upgraded project architecture to align with the latest web standards, including Spring, Angular, and various open-source libraries, ensuring improved compatibility and maintainability.
- Optimized AWS infrastructure by reconfiguring the team's AWS account to meet stringent company security policies, enhancing system reliability and compliance.
- Introduced automation with Git-based CI pipelines, automating build and deployment processes, which significantly reduced manual effort and errors.
- Developed and delivered new features, ensuring seamless support for additional devices and expanding the project's capabilities.
- Represented the team during Demo Days, presenting progress and outcomes to HQ, showcasing project impact and aligning stakeholder expectations.
- Conducted AWS knowledge-sharing sessions, upskilling team members in cloud technologies and fostering a collaborative learning environment.

Senior Software Engineer, Helmes

04/2022 – 05/2023

Solera.com (Warsaw, Poland)

Spring Boot, Java 8, Maven, React + Redux

- Worked on a global software solution for the accounting of vehicle insurance cases, damage capturing, and managing relations between insurance and repair companies.
- Migrated functionality to a new custom framework based on Spring + React.js.
- Developed new features, wrote unit tests, and implemented custom integration testing solutions.
- Maintained documentation for the project and participated in Scrum processes.
- Conducted code reviews, knowledge sharing, and provided team support.
- Led interviews for candidates and proposed approaches and solutions.

Lead Software Engineer, Smartym Pro

02/2019 – 03/2022

Token.io Open Banking Project (Warsaw, Poland)

Java 17, Dagger2, Spring Boot, gRPC, Kubernetes, Kafka, Bamboo Ci

- Launched and organized team processes.
- Led the team, interviewed candidates, and collaborated closely with the customer for synchronization with adjacent teams.
- Proposed architecture changes and led code reviews.
- Managed the code delivery process and extended the monitoring system for components.

Goji.investments Investment Platform (Warsaw, Poland)

Java 17, Kotlin, Spring Boot, Kafka, RabbitMQ, AWS, Nomad, GoCD

- Implemented new features related to ACL and API.
- Improved the SQS messaging system and contributed to template development for microservices.

NoCatFish Tinder-like Mobile Application Backend (Minsk, Belarus)

Java 17, Spring Boot, AWS

- Developed the MVP and set up AWS environments for dev and staging with CI.
- Analyzed AWS Rekognition opportunities and implemented health monitoring metrics.

Software Engineer, Freelance (Minsk, Belarus)

04/2017 – 02/2019

MaximumEscape.com (Minsk, Belarus)

Java 8, Spring Boot, Vue.js, Knockout.js

- Led stakeholder communication, gathering and analyzing business requirements, and translating them into technical solutions.
- Built and managed a development team, collaborating closely with the client's team to ensure alignment with project goals.
- Oversaw the search and management of subcontractors to ensure timely delivery and quality standards across the project.
- Developed a sophisticated pricing and booking system for quest management, using Spring and Vue to ensure scalability and flexibility.
- Directed feature development, provided technical mentorship to junior developers, and ensured high-quality deliverables.

ERP System for Small Business (Minsk, Belarus)

- Conducted a deep analysis of complex business processes and systematically migrated them from a legacy custom CRM system to an efficient ERP solution.

- Collaborated closely with the client to understand requirements, educate employees, and ensure smooth implementation.
- Managed subcontractor relationships to ensure comprehensive coverage of the entire development lifecycle.
- Applied non-standard network solutions using Asterisk and VPN to address GSM roaming limitations and optimize client communications.
- Developed and maintained server infrastructure, supporting both the CRM and ERP systems, ensuring reliable operations and scalability.

Ecommerce Engineer, Forte Group (Minsk, Belarus)

08/2015 – 04/2017

Healthdirections.com (Minsk, Belarus)

Java 8, J2EE, Oracle ATG, Knockout.js

Developed features for Oracle ATG-based e-commerce solutions, including user registration, product pages, and order processing.

- Created non-standard solutions, such as enabling operators to access user accounts within the framework's limitations.
- Implemented complex shopping cart merge logic, including user authentication and personal account page access.
- Maintained project documentation, providing innovative solutions to improve functionality.

Pureformulas.com (Minsk, Belarus)

Java 8, J2EE, Oracle ATG, Knockout.js

- Solved various challenges, such as parsing large 1Gb+ XML files.
- Saved approximately 1,5 month of team work by developing an automated template-based migration solution.
- Developed a custom platform update solution based on official documentation, as the standard approach was inadequate.

Cosmote.gr (Minsk, Belarus)

Java 8, J2EE, Oracle ATG, jQuery

- Developed UI components to enhance user experience.
 - Assisted with migration from SVN to Git, ensuring smooth transition for the team.
 - Implemented form validation for improved data integrity.
 - Provided support to the team with Linux-related tasks.
-

Education

Oracle ATG Training, Forte Group

10/2015 – 02/2016

- Specialized training covering Oracle ATG components, features, and platform deployment.

Core Java, Enterprise Solutions, Practice, Educational Center of High Technologies Park, Belarus

09/2014 – 03/2015

- Comprehensive course on Java Technology, multi-tier architectures, and best practices in enterprise application development.

Belarusian State University of Informatics and Radioelectronics

09/2008 – 06/2013

- Bachelor's degree in Computer-Controlled Digital Optical Systems. Focus on digital systems design, software development, and automation technologies.
-
